

SALOOJA BROTHERS PRIVATE LTD.

Category: Glassware Borosilicate &Neutral

Cat.No	Product Description	Material / Finish
3862	Burette with pinch cock 'Parco'. Made from neutral glass accurately graduated as per N.P.L. class 'B' accuracy. Complete with pinch cock and glass jet. Individually packed in card board box.	25 & 50 ml.
3863	Burette with stop cock 'Parco'. Accurately graduated as per N.P.L. class 'B' accuracy with straight bore leak proof stop cock with cappillary jet. Made from neutral glass. Individually packed in cardboard box.	25 & 50 ml.
3864	Burettes with stop cock 'Parco'. Same as Cat. No. 3863 with schellbach.	capacity in ml: 25, 50 ML. subdivided in ml: 0.1,
3865	Burette with stop cock 'Parco'. Accurately graduated as per N.P.L. class 'B' accuracy with straight bore leak proof hollow stop cock with cappillary jet. Made from corning glass. Individually packed in cardboard box.	capacity in ml: 10, 25 ml. , 50 ml. subdivided in ml: 0.1,
3866	Burettes with automatic zero 'Parco'. Made from corning glass, cupped top with jet and drainage tube for zero setting and double bore stop cork.	capacity in ml: 10, 25 ml., 50 ml., subdivided in ml: 0.1,
3871	Pipettes volumetric 'Parco'. With one mark, made from neutral glass, accuracy as per N.P.L. class 'B'. Individually packed in cardboard box.	capacity in ml: 1, 2, 5, 10, 20, 25, 50 ml.
3872	Pipettes volumetric 'Parco'. Same as above, made from corning glass.	capacity in ml: 1, 2, 5, 10, 20, 25, 50, 100 ml.
3873	Pipettes graduated 'Parco'. Made from neutral glass accurately graduated as per N.P.L. class 'B' accuracy. Individually packed in cardboard box.	capacity in ml: 1, 2, 5, 10, 20, 25 ml.

Cat. No.	Item Description	Length (mm)
3891	Centrifuge tubes. Made from neutral glass, graduated, capacity 10 ml or 15 ml.	...
3892	Centrifuge tubes. Made from corning glass, plain, capacity 10 ml or 15 ml	...
3893	Centrifuge tubes. Made from corning glass, graduated, capacity 10 ml or 15 ml.	...
3901	Condensers air. Made from corning glass, plain tube, outside diameter 12 mm, with funnel top, outside diameter 23 mm. Overall length in mm: 450	450 mm, 700mm
3902	Condensers liebig. Made from neutral glass, inner tube integral with body. effective length in mm	250mm ,300, 400 mm, 500m
3903	Condensers,liebig.Same as Cat.3902,made from corning glass. effective length in mm	200mm , 400 mm, 500m, 600mm
3904	Condensers, allihn. (Bulb type). Made from corning glass. effective length in mm:	200mm , 300 mm, 400m, 500mm
3905	Condenser, spiral (coil) type. Made from corning glass. effective length in mm:	200mm , 300 mm, 400m, 500mm
3906	Condenser, double surface, Davies. Made from corning glass. effective length in mm	200mm , 300 mm, 400m, 500mm

3910	Carbon dioxide in carbonates apparatus, Schrotter. Consisting of a flask with two ground glass sockets fitted	
------	---	--

Cat. No.	Item Description	Particular
3925	Distillation apparatus. Consisting of flask round bottom with B-24 socket, still head with B-24 and B-19 cone, condenser with B-19 socket and cone and receiver adapter with B-19 socket. Made from corning glass. flask capacity in litres 1	1.00 Litre, Condenser length in mm - 300 mm
3925	Distillation apparatus. Consisting of flask round bottom with B-24 socket, still head with B-24 and B-19 cone, condenser with B-19 socket and cone and receiver adapter with B-19 socket. Made from corning glass. flask capacity in litres 2	2.00 Litre, Condenser length in mm - 400 mm
3925	Distillation apparatus. Consisting of flask round bottom with B-24 socket, still head with B-24 and B-19 cone, condenser with B-19 socket and cone and receiver adapter with B-19 socket. Made from corning glass. flask capacity in litres 3	3.00 Litre, Condenser length in mm - 450 mm

3926	Distillation apparatus ; quickfit type. Comprises of flask round bottom with B-24 socket, still head with B-24 and B-19 cone, condenser with B-19 socket and cone and receiver adapter with B-19 socket. Made from corning glass. flask capacity in litres 1	1.00 Litre, Condenser length in mm - 300 mm
3926	Distillation apparatus ; quickfit type. Comprises of flask round bottom with B-24 socket, still head with B-24 and B-19 cone, condenser with B-19 socket and cone and receiver adapter with B-19 socket. Made from corning glass. flask capacity in litres 2	2.00 Litre, Condenser length in mm - 400 mm
3926	Distillation apparatus ; quickfit type. Comprises of flask round bottom with B-24 socket, still head with B-24 and B-19 cone, condenser with B-19 socket and cone and receiver adapter with B-19 socket. Made from corning glass. flask capacity in litres 3	3.00 Litre, Condenser length in mm - 450 mm
3926	Distillation apparatus ; quickfit type. Comprises of flask round bottom with B-24 socket, still head with B-24 and B-19 cone, condenser with B-19 socket and cone and receiver adapter with B-19 socket. Made from corning glass. flask capacity in litres 5	5.00 Litre, Condenser length in mm - 600 mm
3927	Distillation apparatus, vertical type. Consisting of double wall condenser, with standard interchangeable ground joints. Made from corning glass. single stage	
3928	Double stage	
3929	Distillation continuous water still. Consisting of flask round bottom 2000 ml with B-34 socket at centre and B-19 socket at side neck. Dropping funnel 100 ml with B-34 and B-24 cone, double surface coil condenser with B-24 cone and socket length 200 mm, receiving adaptor with B-24 socket and conical funnel. Made from corning glass.	
3935	Distillation apparatus. For determination of ammonia in water. Consisting of a flask kjeldahl 500 ml with B-24 cone, connecting tube is having inlet tube which permits the introduction of the permanganate solution after distillation of free ammonia with B-24 cones & double coil condenser 200 mm with B-24 socket. Made from corning glass.	

3936	<i>Distillation (vacuum) apparatus. Consisting of a flask round bottom with B-24 socket, still head B-24 socket and cone, double surface coil condenser with B-24 socket and cone, receiver adaptor with vacuum connection with B-24 cone and socket and receiver flask with B-24 socket. corning glass.</i>	
3940	<i>Extraction apparatus soxhlet. Consisting of a flask with extractor and condenser with standard interchangeable ground joints. Made from corning glass.</i>	
3941	<i>Flasks (spare). For extraction apparatus soxhlet, with standard socket ground glass joints. Made from corning glass.</i>	
3945	<i>Flasks distillation. Round bottom with side tube, made from corning glass.</i>	
3955	<i>Filter receiver tubes. With side arm made from corning glass.</i>
